RTM Change Start New Baseline Problem Integration testing of the XRP-II capability to manage consolidated baseline data at the SMC requires two XRP-II systems on separate machines. Currently, only host mass I has XRP-II version 3.1, the version being tested for deployment in Release 2.0. Proposed Solution	Title (description) U	pgrade of X	(RP-II on dip	pe1sun			2	TT.A.	
RTM Change Start New Baseline Problem Integration testing of the XRP-II capability to manage consolidated baseline data at the SMC requires two XRP-II systems on separate machines. Currently, only host mass I has XRP-II version 3.1, the version being tested for deployment in Release 2.0. Proposed Solution Upgrade to version 3.1 the older of two versions of XRP-II currently on host dipe Isun. At the completion of testing, System Engineering and Deployment will begin using this copy for baseline data population. A separate CCR is being submitted to update the ECS Release 2.0 baseline. The new version should be installed in dipe Isun's /data/xrp directory. This can be done by MSS Development. No software license is required. Impact Analysis: Organizations Affected: BOO	Source Nos (RID, NCR, Action Item, GSEC, CCR, etc.) or								
Problem Integration testing of the XRP-II capability to manage consolidated baseline data at the SMC requires two XRP-II systems on separate machines. Currently, only host mss1 has XRP-II version 3.1, the version being tested for deployment in Release 2.0. Proposed Solution Upgrade to version 3.1 the older of two versions of XRP-II currently on host dipe1sun. At the completion of testing, System Engineering and Deployment will begin using this copy for baseline data population. A separate CCR is being submitted to update the ECS Release 2.0 haseline.
